## 2-Step Order of Operations (Step by Step Key) Answer

1. Step 1:  $3 \times 4 = 12 \rightarrow$  Step 2:  $6 + 12 = 18$

2. Step 1:  $8 - 3 = 5 \rightarrow$  Step 2:  $5 \times 5 = 25$

3. Step 1:  $20 \div 4 = 5 \rightarrow$  Step 2:  $5 + 7 = 12$

4. Step 1:  $6 \div 3 = 2 \rightarrow$  Step 2:  $15 - 2 = 13$

5. Step 1:  $9 + 3 = 12 \rightarrow$  Step 2:  $12 \div 6 = 2$

6. Step 1:  $2 + 5 = 7 \rightarrow$  Step 2:  $4 \times 7 = 28$

7. Step 1:  $18 - 10 = 8 \rightarrow$  Step 2:  $8 \div 2 = 4$

8. Step 1:  $12 \div 3 = 4 \rightarrow$  Step 2:  $7 + 4 = 11$

9. Step 1:  $5 \times 3 = 15 \rightarrow$  Step 2:  $15 - 4 = 11$

10. Step 1:  $16 \div 4 = 4 \rightarrow$  Step 2:  $4 + 9 = 13$
