

Name _____

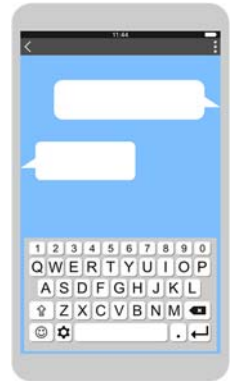

Oops! My Circuits Autocorrected!

Even clever AIs get their wires crossed! Sometimes they pick words that *sound right* but *mean something totally different*-like saying "dessert" when they meant "desert." Your job: be an **AI Vocabulary Fixer**. Read each sentence, **underline the wrong word**, **write the correct word** on the line, and **explain what clue** helped you figure it out.

Example: The dessert was very dry and full of sand.

Correct word: **desert**

Context clue: *sand* tells me it's a dry place, not something you eat.

Your Turn

1. The knight was very polite when he said good night to the king.

Correct word: _____ Context clue: _____

2. I can't bare to see another polar bear in the zoo today.

Correct word: _____ Context clue: _____
