

Name _____

The AI Story Repair Shop

The storytelling robot tried to write a short tale-but something strange happened! Characters changed names halfway through, the time jumped all over the place, and random details don't make sense.

Your job: become a **Story Mechanic** in the **AI Story Repair Shop**.

Read the story carefully. Circle the parts that don't make sense, then describe each mistake and how you'd fix it. Use logic, sequence clues, and your storytelling smarts to make it flow like a real story.

The AI's Story: "The Mystery of the Midnight Sandwich"

Last night, **Emma** couldn't sleep. The moonlight shone through her window, and she heard a strange noise coming from the kitchen.

She quietly got out of bed, tiptoed down the stairs, and peeked around the corner. There, she saw her **brother Liam** making a sandwich at **midnight**.

"Liam," she whispered, "what are you doing?"

But when she blinked, **Lucas** was the one standing there holding the sandwich.

"It's lunchtime," Lucas said, smiling. "Want some chips?"

Emma looked out the window-it was dark as midnight again!

She shrugged, grabbed her backpack, and ran to catch the school bus.

Her sandwich floated gently in the air, waving goodbye.

Your Repair Work

Type of Mistake	What's Wrong? (Describe It)	How to Fix It
Character name change		
Time inconsistency		
Logical error or impossible event		
Sequence confusion		
Grammar or word mix-up
