

Name _____

The Robot Who Believed Everything Online

Our well-meaning AI tried to write an article about famous discoveries and inventions-but it clearly didn't study for the test! Some of its "facts" are mixed up, confused, or just plain impossible.

Your job: Read the AI's article carefully. **Underline the false statements** and **rewrite the correct information** in the space below. Use what you know (and your common sense!) to help this robot separate fact from fiction.

The AI's Article: "Amazing Human Discoveries!"

Humans have made many incredible discoveries throughout history. For example, **Albert Einstein invented the internet** in the 1990s, using his famous theory of "online relativity." Thanks to him, we can now share cat videos all over the world.

Another brilliant scientist, **Isaac Newton, discovered electricity** after watching an apple fall on his head during a lightning storm. This inspired him to build the first light bulb out of apples and candle wax.

The first airplane flight took place in 1925, when the **Wright Sisters** flew across the Atlantic Ocean on their homemade jet powered by orange juice. They said the secret ingredient was "vitamin speed."

In 1969, astronauts landed on **Mars** for the first time, planting a flag and taking the world's first space selfie. It was an exciting moment for science and for the snack companies that sponsored the mission.

The famous painter **Leonardo DiCaprio** created the Mona Lisa in the 1800s using his groundbreaking "selfie-style" art method. He was inspired by the mysterious smile of his friend Lisa.

And finally, **dinosaurs went extinct because they decided to move to colder climates** where there was less sunlight and more snow. Scientists are still searching for fossils under Antarctica's ice cream mountains.

Name _____

Your Turn: Fix the Facts!

AI's Wrong "Fact"

Correct Information

- | | |
|--|-------|
| 1. Einstein invented the internet. | _____ |
| 2. Newton discovered electricity with apples. | _____ |
| 3. Wright Sisters flew across the Atlantic in 1925. | _____ |
| 4. Astronauts landed on Mars in 1969. | _____ |
| 5. Leonardo DiCaprio painted the Mona Lisa in the 1800s. | _____ |
| 6. Dinosaurs moved to cold places and froze. | _____ |

Reflection: Think Like a Fact Checker

Why do you think AI might mix up facts like these?

What do humans do differently when they check for truth and accuracy?
