The Robot Chef's Disaster Diner

Our friendly kitchen robot tried to write some recipes... but something went *terribly* wrong. It seems the AI doesn't quite understand how cooking (or gravity, or logic) actually works!

Your job: Read each "AI recipe" carefully. **Circle the steps that don't make sense**, then **rewrite the recipe** so that a real person could actually follow it. Use logic, common sense, and a little humor to fix the robot's cooking catastrophe!

Example - AI Recipe for Toast:

1. Plug in the moon for extra light.

2. Place a slice of bread in the toaster.

3. Wait for it to turn into a dragon.

4. Spread butter on top and eat.

What doesn't make sense? Steps **1** and **3**
Fixed Recipe: Plug in the toaster, toast the bread, and spread butter on top before eating.

Recipe 1: Pancakes à la Robot

1. Pour two cups of milk into the frying pan before turning it on.

2. Add three clouds for fluffiness.

3. Stir in one cup of flour and a spoonful of sugar.

4. Flip the pancake with your left shoe for luck.

5. Serve with syrup and enjoy!

Circle the steps that don't make sense.
Rewrite the fixed recipe below:

_____

Recipe 2: Spaghetti Surprise

1. Fill a pot with water and bring it to a gentle boil.

2. Add one handful of spaghetti noodles.

3. Sprinkle in some laughter and one piece of the moon.

4. Drain the noodles when they're soft.

5. Toss with tomato sauce and grated cheese.

Circle the steps that don't make sense.
Rewrite the fixed recipe below:

_____

_____

_____

_____

Recipe 3: Chocolate Chip Cookies (AI Edition)

1. Preheat the oven to 350°F.

2. Mix butter, sugar, and imaginary chocolate chips.

3. Add two eggs, then count to one hundred backward.

4. Bake on a cookie sheet until golden brown.

5. Serve with a glass of cloud juice.

Circle the steps that don't make sense.
