## Spot the Logic Glitch!

Sometimes even the smartest AIs say things that sound right... until you actually think about them. These are called **logic glitches**-moments when the AI gets facts, common sense, or the rules of the real world mixed up.

Your job: **Read each AI sentence, figure out what went wrong, explain what the AI misunderstood, and rewrite it so it makes sense.** You're the *Logic Glitch Fixer*!

**Example** -AI said: The fish flew over the city and delivered mail.

**What's wrong:** Fish can't fly or deliver mail.

**Fixed version:** The bird flew over the city and delivered mail.

### Your Turn

1. AI said: The sun put on its pajamas and went to bed behind the mountains.

What's wrong: \_\_\_\_\_

Fixed version: \_\_\_\_\_

2. AI said: The teacher poured homework into everyone's backpack like soup.

What's wrong: \_\_\_\_\_

Fixed version: \_\_\_\_\_

3. AI said: The refrigerator got hungry and ate all the leftovers.

What's wrong: \_\_\_\_\_

Fixed version: \_\_\_\_\_

4. AI said: The car swam across the lake to get to the parking lot faster.

What's wrong: \_\_\_\_\_

Fixed version: \_\_\_\_\_

5. AI said: The baby built a rocket ship and flew to the moon before nap time.

What's wrong: \_\_\_\_\_

Fixed version: \_\_\_\_\_

6. AI said: My shoes called my socks to tell them they were running late.

What's wrong: \_\_\_\_\_

Fixed version: \_\_\_\_\_
