When Robots Caption Wrong (Text Based Captions)

Sometimes, even the most high-tech AIs look at a picture and get it *completely wrong*. They might say a "cat" is a "horse," or claim that "a sandwich is playing basketball." Your job is to be the **AI Caption Fixer**!

Read each AI-generated caption and the short picture description below it. Figure out what went wrong, explain what the AI misunderstood, and write a new caption that actually fits.

Example - AI's Caption: *A cat eating spaghetti at a fancy restaurant.*

Actual Description: A dog sits at a picnic table in a park, licking peanut butter off a spoon.

What went wrong: The AI confused a dog with a cat and didn't notice the park setting.

Your Fixed Caption: *A happy dog enjoys peanut butter at a picnic table in the park.*

Your Turn

1. AI's Caption: *A horse winning a car race.*

Actual Description: A brown horse is standing quietly in a green field while cars race on a track in the distance.

What went wrong: _____

Your Fixed Caption: _____

2. AI's Caption: *A pizza flying through outer space.*

Actual Description: A round space station floats above Earth, glowing with bright lights like pepperoni shapes.

What went wrong: _____

Your Fixed Caption: _____

3. AI's Caption: *A girl swimming underwater with penguins.*

Actual Description: A zookeeper is cleaning the penguin tank from the outside while the penguins swim inside the glass enclosure.

What went wrong: _____

Your Fixed Caption: _____

4. AI's Caption: *A robot eating breakfast with humans at a café.*

Actual Description: A robot waiter is delivering food trays to a group of customers seated at outdoor tables.

What went wrong: _____

Your Fixed Caption: _____
