## Debugging Bad Halloween AI Roleplay

Even spooky characters sometimes slip up and sound way too normal. Your job is to play **AI Debugger**: read each "bad" Halloween roleplay attempt, circle the parts that don't match the creepy style, and rewrite them so they sound scary, funny, or magical-just like real Halloween monsters would!

**Passage 1 - The Ghost (Bad AI Output):** "Hello there. I am in this house right now, and I just wanted to say hi. It's kind of quiet here, and I hope you're having a good evening."

**Step 1:** Circle the words that are too plain or friendly.

**Step 2:** Rewrite the passage so it sounds like a chilling, mysterious ghost.

**Fixed Ghost Version:**

**Passage 2 - The Witch (Bad AI Output):** "Hi guys, I made some soup in my pot. It's going to be tasty. I might invite a friend over to eat with me later."

**Step 1:** Circle the parts that sound too casual.

**Step 2:** Rewrite the passage so it sounds like a witch brewing a magical, spooky potion.

**Fixed Witch Version:**

**Passage 3 - The Vampire (Bad AI Output):** "Hey there, I'm kind of tired today. I'll probably just grab a snack and watch TV for a while. Nighttime is fine, I guess."

**Step 1:** Circle the phrases that are too modern or boring.

**Step 2:** Rewrite the passage so it sounds dark, dramatic, and hungry for blood.

**Fixed Vampire Version:**
