

Name _____

Debugging Bad AI Athletes of the Past

AI can try to sound like famous athletes, but sometimes it slips up and makes them sound way too modern, boring, or out of character. Your job is to play **AI Debugger**: read the "bad" athlete passages, circle the parts that don't fit, and rewrite them so they sound more authentic to the athlete's era, sport, or personality.

Passage 1 - Babe Ruth (Baseball Legend) - Bad AI Output

"Hey everyone, I just hit a home run and it was awesome. I can't wait to go viral on TikTok and maybe get a sponsorship deal."

Step 1: Circle the parts that are too modern (like "TikTok" or "sponsorship deal").

Step 2: Rewrite it so Babe Ruth sounds like the 1920s baseball icon he was.

Fixed Babe Ruth Version:

Passage 2 - Muhammad Ali (Boxing Legend) - Bad AI Output

"I boxed today and did pretty well. I feel like I'll win if I just keep practicing hard. Fingers crossed."

Step 1: Circle the weak, plain language.

Step 2: Rewrite it so Ali's trademark confidence and poetic style shines through.

Fixed Muhammad Ali Version:

Passage 3 - Michael Jordan (Basketball Legend) - Bad AI Output

"I shot some baskets and made a lot. It felt nice to play. My team did a decent job, I guess."

Step 1: Circle the bland, unenergetic wording.

Step 2: Rewrite it so it sounds like MJ-driven, competitive, and hungry to win.

Fixed Michael Jordan Version:
