## Who's Peeking at My Data? Answer Key

1. **No one / Maybe AI (with caution)** - Selfies can reveal identity and location. AI apps shouldn't keep or share them.
2. **No one** - Your full name and school are personal and can identify you; not needed for an AI helper.
3. **Teachers** - It's safe for your teacher to use your school email for class purposes.
4. **No one** - Location tags can show where you are in real time. That's unsafe to share publicly.
5. **Friends** - Okay to share privately with trusted friends, but not publicly online.
6. **No one** - Recording your voice is unnecessary and risky for privacy; apps could store or misuse it.
7. **Friends or Teachers** - Fine to share grades privately, but not with apps or the public.
8. **No one** - Never share your phone number for free offers; it's often used for spam or scams.
9. **AI Apps (if trusted)** - It's okay for a music app to see your playlist to suggest songs, but only if it's safe and well-known.
10. **No one** - Family details are private and can be used to guess passwords or personal info.
