Name _____

Dear AI... Maybe Don't Tell It That

AI chatbots and smart tools can be super helpful - for writing, learning, or just having fun. But remember: even the smartest AI doesn't need *everything* about you. Read each message below - like something someone might "confess" to an AI. For each one, decide if it's **Safe to Share** or **Never Share**, and explain your reasoning in one or two sentences. Think about what kind of information it gives away and what could happen if that information was leaked, copied, or misunderstood.

Example 1 - "I can't find my math homework. I live at 248 Elm Street, Apartment 3B - can you tell my teacher I'll send it later?"

Your Label: ☐ Safe to Share   ☐ Never Share

Reasoning: _____

Example 2 - "I'm feeling really tired today because I didn't sleep much last night. Any ideas for staying awake in class?"

Your Label: ☐ Safe to Share   ☐ Never Share

Reasoning: _____

Example 3 - "Hey AI, my parents are out and I'm home alone - want to chat so it's not so quiet?"

Your Label: ☐ Safe to Share   ☐ Never Share

Reasoning: _____

Example 4 - "Here's my school email and password so you can help me log in faster: sunnykid@school.org / MathRocks123."

Your Label: ☐ Safe to Share   ☐ Never Share

Reasoning: _____

Example 5 - "I just got a new puppy named Luna! She's so fluffy - here's a picture!"

Your Label: ☐ Safe to Share   ☐ Never Share

Reasoning: _____
