## Prediction Challenge - Human Thinking vs. AI Thinking

1. Read each prompt.
2. Write down what you think **a human** might say in response.
3. Write down what you think **an AI** might say in response.
4. Compare the two answers – which is stronger? Which is weaker? Why?

**Example: Prompt:** "Why did the chicken cross the road?"

Human response: "To get to the other side!" (a well-known joke answer)

AI response: "The chicken might have crossed to reach food, avoid danger, or follow instinct."

**1. Riddle Prompt** - *"What has hands but can't clap?"*

Human response: \_\_\_\_\_

AI response: \_\_\_\_\_

**2. Joke Prompt** - *"Tell me a funny ending to this: A robot walks into a classroom and..."*

Human response: \_\_\_\_\_

AI response: \_\_\_\_\_

**3. Creative Prompt** - *"Imagine if trees could talk for one day. What might they say?"*

Human response: \_\_\_\_\_

AI response: \_\_\_\_\_

**4. Problem-Solving Prompt** - *"You forgot your homework at home. What do you do?"*

Human response: \_\_\_\_\_

AI response: \_\_\_\_\_

## Reflection

Which answers sounded more **logical**?

Which answers sounded more **creative** or **funny**?

Did one type (human or AI) surprise you more? Why?
