Name _____

AI Error Repairmen

Instructions: AI sometimes makes surprising mistakes. You will be given a series of AI thoughts and mistakes that you will need correct and explain why a human would understand the situation differently.

Example (Completed for You)

AI Mistake - Translates "It's raining cats and dogs" as "Animals are falling from the sky."

Corrected Answer - It means "It's raining heavily."

Why a human would not make this mistake - Humans know it's an expression, not something literal.

1. AI Mistake - A photo recognition program labels a blueberry muffin as a "dog's face."

Corrected Answer - _____

Why a human wouldn't make this mistake - _____

2. AI Mistake - A chatbot answers "What is heavier, a ton of feathers or a ton of bricks?" with "Bricks are heavier."

Corrected Answer - _____

Why a human wouldn't make this mistake - _____

3. AI Mistake - A voice assistant hears "Play The Beatles" and plays "beetle sound effects."

Corrected Answer - _____

Why a human wouldn't make this mistake - _____

4. AI Mistake - A navigation AI tells a driver to turn left into a lake because it follows GPS directions too literally.

Corrected Answer - _____

Why a human wouldn't make this mistake - _____
