## Lewis vs. Relativism

**Instructions:** In *The Abolition of Man*, C.S. Lewis argues for the importance of **objective value** (a universal moral law) and warns against **relativism** (the belief that values are subjective and personal). Today, many cultural debates reflect moral relativism.

Fill in the chart with details from Lewis's essay and a chosen modern example of moral relativism (e.g., "everyone has their own truth," online debates about "cancel culture," or arguments about morality being based only on feelings).
