

Name _____

Field Of Acronyms

Directions: Read through the passage carefully. As you read, **notice the acronyms** and decide the **subject area** each one belongs to: **science**, **technology**, or **social media**. Then, write what each acronym stands for below the correct category.

In science class, Maya learned that **DNA** carries the genetic code that makes each living thing unique. Later, her teacher mentioned that doctors use **MRI** scans to look inside the human body safely. During computer lab, Maya switched gears to technology, learning how **AI** helps robots make decisions and how **HTML** organizes the content of web pages.

When the school day ended, Maya opened her phone to scroll through social media. She saw her friend post a video labeled **LOL** in the caption, tagged with **DM me** for replies. Before bed, she shared a funny photo using **BTW**, reminding her followers about tomorrow's science test. Maya realized acronyms weren't just words—they were part of nearly every world she explored!
