

Name _____

Party Or Classroom?

Directions: Read the story carefully. Then choose the best answer (A-D) for each question.

The Class Party Mix-Up

Maya was excited all morning because her class was having a party after lunch. During math, she could hardly sit still. She laughed out loud when her pencil rolled off the desk, but the teacher gave her a gentle reminder to focus. Maya remembered that class time was for quiet work, not for party fun.

When the bell finally rang for the party, everyone helped move the desks and set up snacks. Maya started talking loudly and clapping her hands. Her teacher smiled and said, "Now it's party time, but let's still be respectful." Maya realized that even though the rules changed a little for fun, she still needed to use good manners. She shared her cookies, waited her turn for games, and said "thank you" when it ended.

By the end of the day, Maya learned that every setting has its own kind of behavior. You can be excited at a party, but calm and focused in class. Knowing when to change your behavior helps everyone enjoy the day.

1. Why did Maya laugh out loud during math?
 - A. Because it was party time
 - B. Because her pencil rolled off the desk
 - C. Because someone told a joke
 - D. Because the teacher said something funny
2. What did the teacher remind Maya about during class?
 - A. To be quiet and focus
 - B. To eat her snack early
 - C. To move her desk
 - D. To invite friends to the party
3. How did Maya act when the party started?
 - A. She sat silently
 - B. She read her book
 - C. She talked loudly and clapped
 - D. She went home early
4. What did Maya do to show good manners at the party?
 - A. She left early
 - B. She played alone
 - C. She shouted over everyone
 - D. She shared her cookies and waited her turn
5. What lesson did Maya learn by the end of the day?
 - A. Rules are the same everywhere
 - B. You can act however you want
 - C. Different places need different behaviors
 - D. Parties are more important than schoolwork
