

Decimal Checkup Answer Key

1. 6.95
2. 11 (7 + 4)
3. Mistake: The hundredths were added incorrectly. The correct sum is 7.84.
4. 4.55
5. \$6.25
6. 4.13 m
7. 4.35 km
8. Answers will vary. Example: $4.75 + 5.25 = 10.00$

Teacher's Guide

- Review decimal place value before students begin the worksheet.
- Encourage students to estimate before solving each addition problem.
- Remind students to line up decimal points during computation.
- Provide place value charts or graph paper for students who need additional support.
- Let students compare strategies for the error analysis and missing addend problems.
- Extend the lesson by having students create one review question for each skill on the worksheet and exchange with a partner.
