

Name _____

Fraction Mystery

Directions: Find the missing fraction in each equation. Use a common denominator. Write your answer in simplest form.

1. $\frac{1}{2} + \square = \frac{5}{6}$

2. $\square + \frac{1}{6} = \frac{11}{12}$

3. $\frac{2}{5} + \square = \frac{9}{10}$

4. $\square + \frac{1}{4} = \frac{5}{8}$

5. $\frac{5}{6} + \square = \frac{17}{18}$

6. $\square + \frac{5}{12} = \frac{13}{12}$

7. $\frac{3}{10} + \square = \frac{1}{2}$

8. $\square + \frac{2}{7} = \frac{15}{28}$

9. $\frac{5}{12} + \square = \frac{19}{24}$

10. $\square + \frac{2}{3} = 1\frac{13}{24}$
