

Name _____

Fraction Switch

Directions: Rewrite each pair of fractions using the given common denominator. Do not add the fractions.

1. Common denominator: 12

$$\frac{1}{3} = \frac{\quad}{12} \quad \frac{1}{4} = \frac{\quad}{12}$$

2. Common denominator: 10

$$\frac{2}{5} = \frac{\quad}{10} \quad \frac{1}{2} = \frac{\quad}{10}$$

3. Common denominator: 24

$$\frac{5}{8} = \frac{\quad}{24} \quad \frac{1}{6} = \frac{\quad}{24}$$

4. Common denominator: 18

$$\frac{2}{3} = \frac{\quad}{18} \quad \frac{5}{9} = \frac{\quad}{18}$$

5. Common denominator: 20

$$\frac{3}{4} = \frac{\quad}{20} \quad \frac{1}{5} = \frac{\quad}{20}$$

6. Common denominator: 30

$$\frac{4}{5} = \frac{\quad}{30} \quad \frac{2}{3} = \frac{\quad}{30}$$

7. Common denominator: 28

$$\frac{3}{7} = \frac{\quad}{28} \quad \frac{1}{4} = \frac{\quad}{28}$$

8. Common denominator: 36

$$\frac{5}{12} = \frac{\quad}{36} \quad \frac{7}{18} = \frac{\quad}{36}$$

9. Common denominator: 16

$$\frac{3}{8} = \frac{\quad}{16} \quad \frac{1}{2} = \frac{\quad}{16}$$

10. Common denominator: 42

$$\frac{5}{6} = \frac{\quad}{42} \quad \frac{2}{7} = \frac{\quad}{42}$$
