

Name _____

African Insights Answer Key

1. True
2. False
3. True
4. True
5. False
6. True
7. True
8. True
9. False
10. True

Teacher Guide

- Use this worksheet to help students build a solid understanding of African geography, climate, and wildlife.
- For grades 3 to 5, read the statements aloud and model how to think through each one using clues from prior lessons.
- For grades 6 to 8, encourage students to justify their answers by referencing specific features of Africa such as deserts, rivers, and biomes.
- Provide vocabulary support for terms like savanna, basin, climate zone, and ecosystem if needed.
- For engagement, let students rewrite two false statements so they become true.
- For differentiation, allow students to use a map or textbook section about Africa's physical features as a reference.
- For extension, assign students to choose one fact from the worksheet and write a short paragraph explaining its importance to African geography.
