

Name \_\_\_\_\_

## Wild Africa Answer Key

1. desert
2. rainforest
3. savanna
4. elephant
5. giraffe
6. hippopotamus

### Teacher Guide

- This worksheet introduces younger learners to African animals and the biomes where they live.
- Before students begin, review the word bank by showing pictures or pointing out locations on a classroom map.
- Encourage grades 3 to 5 students to use context clues in the sentences to choose the correct term.
- For students who need help, read the sentences aloud and pause before the blank to let them think about the meaning.
- For engagement, let students draw one animal and label its habitat using one of the biome words.
- For differentiation, provide sentence starters or model how to eliminate words in the bank that do not fit.
- As an extension, invite students to pick one animal from the worksheet and write one or two sentences describing how it survives in its habitat.
