

Name _____

Africa Terms Answer Key

1. C
2. E
3. D
4. F
5. A
6. B

Teacher Guide

- This worksheet helps students strengthen foundational geography vocabulary used when studying Africa and other world regions.
- For grades 6 to 8, encourage students to look for key clue words such as elevated, mouth of a river, or islands to guide their choices.
- Review each term briefly before starting to ensure students understand how these features appear on maps.
- For students who need support, provide example sentences using the terms in context, such as The Nile Delta is where the river spreads into many small channels.
- For engagement, let students create a quick sketch of one of the vocabulary terms to show its shape or structure.
- For differentiation, give students two definitions at a time rather than all at once, or allow them to use classroom atlases.
- As an extension, ask students to write a short paragraph explaining how two of these features influence human settlement in Africa.
