

Name _____

African Landforms Answer Key

1. C
2. A
3. B
4. D
5. A
6. C
7. B
8. D

Teacher Guide

- This worksheet helps students identify major African landforms using key physical features and geographic clues.
- For grades 3 to 5, read each question aloud before students choose an answer to support comprehension.
- For grades 6 to 8, challenge students to justify why the correct answer fits the description and eliminate the other three choices.
- Provide vocabulary support by reviewing the words desert, highlands, basin, valley, and delta before students begin.
- For engagement, let students draw one of the landforms and label its most important features.
- For differentiation, offer sentence frames such as I chose this answer because it matches the clue about or This landform is known for.
- For extension, assign a short research task on how one of these landforms affects the climate, wildlife, or human life in that region.
