

Name _____

Real-World Pairs Answer Key

- | | |
|----------------------|-------------------------------|
| 1. Student | 6. Drowning (or water rescue) |
| 2. Painting | 7. Concert |
| 3. Minerals (or ore) | 8. Orchestra |
| 4. Airplane | 9. Experiment |
| 5. Stage | 10. Eyes |

Teacher's Guide

- **Differentiation Tips:**
 - For developing learners, provide visuals (e.g., pictures of a doctor and patient) to help identify relationships.
 - For advanced learners, ask students to explain the *type* of relationship (e.g., "helper → person helped," "creator → creation").
- **Engagement Ideas:**
 - Play "Analogy Match-Up" where students pair cards showing the first and second halves of each analogy.
 - Have students act out an analogy silently while others guess the pair (e.g., chef cooking → actor performing).
- **Extension Activities:**
 - Encourage students to write their own real-life analogies using school, sports, or community examples.
 - Turn analogies into short paragraphs or mini stories that explain the relationships in action.
- **Skill Focus:** Strengthens understanding of **real-world word relationships**, **logical reasoning**, and **context-based vocabulary**, while deepening connections between **language and experience**.
