

Name _____

Power on the Farm Answer Key

Strong Thesis Example (Yes side):

Power does corrupt those who hold it, because Orwell shows how noble ideas are twisted once leaders gain control.

Strong Thesis Example (No side):

Power itself does not always corrupt; rather, it exposes the intentions of those who wield it.

Possible Supporting Evidence:

- Napoleon's rise mirrors **Stalin's corruption**, proving how unchecked power leads to tyranny.
- The pigs change the **Seven Commandments** to benefit themselves, showing moral decay through authority.
- Boxer's loyalty is **exploited**, demonstrating how power corrupts relationships and values.
- OR, on the "No" side: Snowball's vision for education and progress suggests power can be used for good if not violently suppressed.

Sample Conclusion Idea:

Orwell's fable shows that without accountability, power almost always leads to corruption: a warning that remains important in politics and leadership today.
