

Name _____

Asian Climate Insights

Directions: Answer each question in two to four complete sentences. Use clear explanations based on what you know about Asia's climate.

1. How do monsoons form and what causes the seasonal shift between heavy rain and dry conditions in parts of Asia?

2. Why does temperature vary so widely across Asia even though it is one continent?

3. How do large mountain ranges in Asia influence the climate of the regions around them?

4. Why do coastal areas in Asia often have more moderate temperatures compared to inland regions?

5. How does latitude affect the climate differences between northern and southern Asia?
