8. True.
9. False. The account earned \$1.50 in interest.
10. True.

Teacher's Guide

- Quick implementation: Give students time to scan the statement before evaluating each claim. Require corrections only for false statements.
- Differentiation: Encourage students to underline the transaction or account detail that provides evidence for each answer.
- Engagement: Have students earn one point for identifying True or False correctly and one additional point for each accurate correction.
- Extension: Ask students to verify the ending balance by applying all deposits and withdrawals to the beginning balance.
