

Name _____

Reading Rally Answer Key

1. 5 books
2. 40 books
3. 25 books
4. Animals
5. 10 books
6. 15 books
7. 55 books
8. 150 books

Teacher's Guide

- Point out the scale before students begin and emphasize that each bar unit represents 5 books, not 1 book.
- Encourage students to count bar units and multiply by 5 when determining each value.
- For extra support, have students count aloud by 5s while moving across each bar.
- For a challenge, cover the values printed beside the bars and have students determine them using only the scale.
- Increase engagement by asking students to predict which category represents the most books before calculating the values.
- Extend the activity by asking students to determine how many bar units would be needed to represent 45 or 50 books.
