

Name _____

Snack Sales Answer Key

Popcorn: Bar reaches 30.

Pretzels: Bar reaches 20.

Cookies: Bar reaches 35.

Fruit Cups: Bar reaches 15.

Nachos: Bar reaches 25.

Teacher's Guide

- Review the scale first and emphasize that each interval represents 5 items sold.
- Have students locate each sales total on the number axis before drawing its bar.
- For extra support, practice skip-counting by 5s from 0 to 35 before students begin.
- For a challenge, ask students to complete the graph without referring to the printed values after locating each height.
- Increase engagement by having students predict which snack will have the tallest and shortest bars before graphing.
- Extend the activity by changing one sales total and asking students to redraw only the affected bar.
