

Name _____

Snack Bar Graph Answer Key

1. 5 students
2. Popcorn
3. Pretzels
4. 6 students
5. 11 students
6. 3 students
7. 2 students
8. 30 students

Teacher's Guide

- Have students identify the graph title, categories, and key before answering the questions.
- Encourage students to count each bar carefully and connect its length to the category value.
- For extra support, let students mark or number the blocks as they count.
- For a challenge, cover the printed numbers beside the bars so students must determine each value from the graph alone.
- Increase engagement by asking students to predict the most and least popular snacks before reading the graph.
- Extend the activity by having students create one additional question about the graph for a partner to solve.
