Teacher's Guide

- **Differentiation:** For students who need support, say the picture word and two possible rhymes aloud, then let the student choose one to write. For students who are ready, ask them to write a different rhyme than a partner used.
- **Engagement:** Have students say the picture word, clap once, then say their rhyme. This helps them hear the matching ending sound.
- **Extension:** Students pick three items and draw their own pictures for the rhyme they wrote, then label both words underneath.
