Teacher's Guide

- **Before students start:** Model one example by saying both words slowly and listening for the **same ending sound** (cat, hat).
- **Differentiation:** If students need support, let them point and repeat after you, or offer two choices at a time (cat matches hat or car). For students ready for more, have them say a new rhyming word for each pair (cat, hat, bat).
- **Engagement:** Turn it into a quick call-and-response: you say the left word, the class says the rhyming match from the right column.
- **Extension:** After matching, students choose any two pairs and draw a simple picture scene that includes both items (cat and hat).
