

Electric Main Ideas Answer Key

Sample Summary:

Electric cars are becoming more popular because they reduce pollution and greenhouse gas emissions. Governments and car companies are supporting this shift with incentives and new technology, though high costs and limited charging stations remain challenges. Overall, experts believe electric cars are key to a cleaner and more sustainable future.

Teacher Notes / Guide

- Look for summaries that **combine ideas** rather than copy details.
- A good summary should mention:
 1. **Growth of electric cars**
 2. **Environmental benefits**
 3. **Support from governments/companies + challenges**
 4. **Future importance**
- Answers may be worded differently, but they should not include minor details like *"aluminum cans"* or *"rural areas."*
- Remind students that summaries show **the heart of the text** in fewer words.
