

Name _____

Ch Roll And Read Answer Key

Students should correctly read aloud the **ch** words in each row when the number is rolled.

This activity checks oral decoding, so accuracy is based on correct pronunciation of the beginning **ch** blend.

Teacher's Guide

- Model how to do one roll before students begin. Say the number, point to the row and read the **ch** words smoothly.
- Listen for the clear **ch** sound at the beginning of each word. Prompt students to try again if they say a hard c or sh sound instead.
- For students needing extra support, limit practice to rows 1 to 3 until they gain confidence.
- For students ready for a challenge, have them choose one word from the row they read and use it in an original sentence.
- For small group practice, let partners take turns rolling and checking each other's reading.
