

Order To Outcome Answer Key

Correct Order:

1. Olivia packed sandwiches, fruit, and drinks.
2. Olivia met her friends at the park with a blanket.
3. Dark clouds rolled in and thunder was heard.
4. Raindrops began to fall and everyone gathered their things.

Future Prediction (Sample Answer):

Next, Olivia and her friends would probably look for shelter from the rain, like under a gazebo or nearby café. Since their picnic was ruined, they might decide to eat their food indoors instead. This prediction makes sense because people usually find cover when a storm begins.

Teacher Notes / Guide

- Emphasize that predictions should be **logical and connected** to what already happened, not random guesses.
- Highlight **signal words** (*first, then, later, soon after*) to show the timeline clearly.
- Extension: Ask students to write a short alternate ending (e.g., the rain stops quickly, or the friends decide to play in the rain).
