

Name _____

Complete The Sequence Answer Key

Possible Missing Step: Maya mixed the ingredients together to make cookie dough.

Comprehension Answers:

1. She gathered flour, sugar, butter, and eggs on the counter.
2. The missing step is mixing the ingredients to form dough.
3. She placed the dough scoops on a baking sheet.
4. It's important to notice missing steps because otherwise the process or story won't make sense. In this case, you can't bake cookies without mixing the ingredients first.

Teacher Notes / Guide

- This activity develops both **reading comprehension** and **critical thinking**.
- Encourage students to justify their missing step; multiple correct answers are acceptable if logical (e.g., "cracking the eggs into a bowl" or "stirring the mixture until smooth").
- Extension: Have students create their own short sequence with a missing step and swap with a partner to solve.
