Bake & Sequence

Directions: Read the passage carefully. Fill in the **Process Organizer** below with the correct steps in order. Then, add one more final step of your own to complete the process logically.

How to Bake a Cake

Baking a cake takes careful steps. Begin by gathering your ingredients: flour, sugar, eggs, butter, and milk. Grease a pan so the cake won't stick. Crack the eggs into a bowl and mix them with the sugar, butter, and milk. Add the flour slowly and stir until the batter is smooth. Pour the batter into the pan and place it in the oven. When the cake is golden brown, remove it from the oven and let it cool. Finally, add frosting or decorations before serving.
