## Fizz Flow

**Directions:** Read the procedure for a science experiment below, then answer the comprehension questions that follow.

### *Vinegar and Baking Soda Volcano*

Here is the procedure for a fun science experiment:

1. Place a small plastic bottle in the middle of a tray.
2. Add a few spoonfuls of baking soda into the bottle.
3. Pour some vinegar into a separate cup.
4. Slowly pour the vinegar into the bottle with the baking soda.
5. Watch the fizzy eruption spill out like lava.

### Questions

1. What is the very first thing you must set up before adding ingredients?  
\_\_\_\_\_
2. Which step happens right before the vinegar is poured into the bottle?  
\_\_\_\_\_
3. What is the last thing that happens in this experiment?  
\_\_\_\_\_
4. If you mixed the steps out of order, what might go wrong? Explain in 1-2 sentences.
