## Cloud Comparison

Choose **two cloud types** from the list below:

- Cirrus
- Stratus
- Cumulus
- Cumulonimbus
- Nimbostratus
- Altocumulus
- Cirrostratus
- Cirrocumulus

Label the circles with your chosen first cloud type and second cloud type.

- In the **left circle**, write traits unique to the first cloud type.
- In the **right circle**, write traits unique to the second cloud type.
- In the **overlapping middle section**, write traits they share.

### Reflection Questions

1. How does comparing clouds side by side help you understand their differences?
2. Which of the two cloud types is more likely to produce dangerous weather? Explain.
