

Name _____

Property Payday Answer Key

1. \$7,400.00
2. \$12,000.00
3. \$11,375.00
4. \$18,450.00
5. \$16,800.00
6. \$18,125.00

Teacher's Guide

- Quick implementation: Review how to convert a commission percentage to a decimal, then multiply it by the property sale price.
- Differentiation: Provide the decimal forms of the rates for students who need support. Challenge advanced students to calculate without a calculator.
- Engagement: Have students act as real estate agents calculating their earnings after six fictional property sales.
- Extension: Ask students to rank the properties from least to greatest commission earned and determine the difference between the highest and lowest commissions.
