

Name _____

Commission Sprint Answer Key

1. \$27.00
2. \$36.00
3. \$50.00
4. \$60.20
5. \$128.00
6. \$141.00
7. \$117.00
8. \$160.00
9. \$108.00
10. \$247.50

Teacher's Guide

- Quick implementation: Review the formula $\text{Commission} = \text{Sales} \times \text{Commission Rate}$. Remind students to convert each percent to a decimal before multiplying.
- Differentiation: Allow students who need support to write the decimal equivalent of each rate beside the problem. Challenge advanced students to solve without a calculator.
- Engagement: Present the activity as a sales challenge. Students can track how many commissions they calculate correctly in a set amount of time.
- Extension: Have students find the total commission earned across all 10 sales or create two additional sales and commission-rate problems for a classmate.
