

Name _____

Sales Champions Answer Key

Amira: \$1,080.00

Ben: \$1,200.00

Chloe: \$1,280.00

Diego: \$1,540.00

Erin: \$1,350.00

Felix: \$1,300.00

Ranking: 1st Diego, 2nd Erin, 3rd Felix, 4th Chloe, 5th Ben, 6th Amira.

Teacher's Guide

- Quick implementation: Have students calculate all six commissions before ranking the employees. Remind them that the highest sales total does not always produce the highest commission.
- Differentiation: Provide decimal equivalents of the rates for students needing support. Challenge advanced students to calculate the differences between consecutive rankings.
- Engagement: Have students predict the top salesperson before calculating, then compare their prediction with the final award ranking.
- Extension: Ask students to determine how much additional commission the 2nd-place employee would need to tie for 1st place.
