

Name _____

Commission Connections Answer Key

1. D
2. H
3. B
4. F
5. A
6. G
7. C
8. E

Teacher's Guide

- Quick implementation: Remind students to convert each commission rate to a decimal, multiply it by the sales amount, and locate the result in the Answer Bank.
- Differentiation: Let students needing support write each rate as a decimal beside the problem. Challenge advanced students to calculate mentally when possible.
- Engagement: Have students cross out each answer-bank amount as it is matched. This turns the final few problems into a process of calculation and elimination.
- Extension: Ask students to rank the eight commission amounts from least to greatest and identify which salesperson earned the most commission.
