### Teacher's Guide

- This worksheet supports understanding of **common suffix meanings** by prompting students to choose the suffix that matches a meaning clue.
- For students who need support, read each meaning aloud and offer oral choices of suffixes before having them write the full word.
- For on-level students, encourage them to explain why a suffix fits the meaning using the terms **without**, **full of**, or **state of**.
- For extension, ask students to create their own sentences using two of the new words or brainstorm new base words that can take each suffix.
