

Name _____

Apply the Commutative Property

Directions: Fill in the blanks to make each equation true using the **Commutative Property** of Addition or Multiplication.

1) $4 + 7 = 7 + \underline{\quad}$

6) $7 \times 3 = \underline{\quad} \times 7$

2) $6 \times 9 = \underline{\quad} \times 6$

7) $2 + 16 = 16 + \underline{\quad}$

3) $3 + 12 = 12 + \underline{\quad}$

8) $10 \times 4 = \underline{\quad} \times 10$

4) $8 \times 5 = 5 \times \underline{\quad}$

9) $11 + 6 = \underline{\quad} + 11$

5) $9 + 14 = 14 + \underline{\quad}$

10) $9 \times 8 = 8 \times \underline{\quad}$

Compute Both Orders

11. $5 + 8$ and $8 + 5 \rightarrow$ _____

12. 7×4 and $4 \times 7 \rightarrow$ _____

13. $9 + 13$ and $13 + 9 \rightarrow$ _____

14. 6×2 and $2 \times 6 \rightarrow$ _____

15. $15 + 3$ and $3 + 15 \rightarrow$ _____

Rewrite Using the Property

16. Rewrite $9 + 12$ using the Commutative Property of Addition: _____

17. Rewrite 7×11 using the Commutative Property of Multiplication: _____

18. Rewrite $10 + 8$ using the Commutative Property of Addition: _____

19. Rewrite 5×9 using the Commutative Property of Multiplication: _____

20. Rewrite $14 + 6$ using the Commutative Property of Addition: _____
