

Apply the Commutative Property Answer Key

Find the Missing Number

1. $4 + 7 = 7 + \mathbf{4}$
2. $6 \times 9 = \mathbf{9} \times 6$
3. $3 + 12 = 12 + \mathbf{3}$
4. $8 \times 5 = 5 \times \mathbf{8}$
5. $9 + 14 = 14 + \mathbf{9}$
6. $7 \times 3 = \mathbf{3} \times 7$
7. $2 + 16 = 16 + \mathbf{2}$
8. $10 \times 4 = \mathbf{4} \times 10$
9. $11 + 6 = \mathbf{6} + 11$
10. $9 \times 8 = 8 \times \mathbf{9}$

Compute Both Orders

11. $5 + 8 = 13$ and $8 + 5 = 13 \rightarrow$ same result
12. $7 \times 4 = 28$ and $4 \times 7 = 28 \rightarrow$ same result
13. $9 + 13 = 22$ and $13 + 9 = 22 \rightarrow$ same result
14. $6 \times 2 = 12$ and $2 \times 6 = 12 \rightarrow$ same result
15. $15 + 3 = 18$ and $3 + 15 = 18 \rightarrow$ same result

Rewrite Using the Property

16. Rewrite $9 + 12 \rightarrow \mathbf{12 + 9}$
17. Rewrite $7 \times 11 \rightarrow \mathbf{11 \times 7}$
18. Rewrite $10 + 8 \rightarrow \mathbf{8 + 10}$
19. Rewrite $5 \times 9 \rightarrow \mathbf{9 \times 5}$
20. Rewrite $14 + 6 \rightarrow \mathbf{6 + 14}$
