# Why Context Matters! Answer Key

**Part 1: Warm-Up - What's Context?**

**Correct Answer: #2**
**Why:** It tells the AI who the audience is (3rd graders), how to explain (simple words), and what details to include (sunlight and water).

**Part 2: Before & After**

<u>Questions</u>

**1. Which story was more fun to read? Why?**
*The second story (Prompt B)* — it's more interesting because it has characters (Bella and the puppy), a setting (the park), and a clear message (making friends).

**2. What details in Prompt B helped the AI make a better story?**
*Details that helped:*

- "for 2nd graders" → tells the AI who the audience is

- "about a shy dog" → gives a main character and emotion

- "at the park" → gives a setting

- "learns to make friends" → gives a theme or message

**3. What kind of context did the writer add? (Check all that apply.)**
☑ Who it's for
☑ What the story is about
☑ Where it happens
☑ How long it should be (since it said "short story")

**Part 3: Try It Yourself! -** *(Answers will vary - sample responses below)*

**Prompt A:** "Write a poem."

**Prompt B:** "Write a short, funny poem for 4th graders about a rainy day, using rhyming words and cheerful feelings."

**Explanation:** Prompt B tells the AI *what kind* of poem, *who it's for, what topic to use,* and *what tone/style* to follow - that's strong context!
