

Judgment Time Answer Key

1-3. Sample Responses:

- **Agree Example Judgment:**

- *I agree that schools should ban homework because students need time to recharge after school, and family time is valuable. Research also shows that too much homework can increase stress without improving learning.*

- **Disagree Example Judgment:**

- *I disagree with the author because homework gives students extra practice that reinforces learning. It also helps build responsibility and time-management skills for future success.*

(Both answers are acceptable if reasons are thoughtful and supported.)

4. **Opposite Position Example:** Someone might argue that homework is necessary for reviewing material and preparing for exams.

5. **Importance of independent judgment:** It develops critical thinking and ensures students evaluate arguments instead of blindly agreeing.

Teacher Guide/Notes

- **Skill Emphasis:** Students practice **evaluating arguments** and forming their own supported stance, which is central to critical comprehension.
- Stress that **there is no single “right” answer:** what matters is the strength and clarity of reasoning.
- Extension activity: Organize a **mini-debate** where half the class defends the author's view and the other half challenges it, using their written judgments.
