

Name _____

Draw And Solve

Directions: Draw the model named in each problem. Then write the equation and solve.

1. Use a hundred grid.
Shade 0.28. Then shade 0.45 more.

Equation: _____

Answer: _____

2. Use base-ten blocks.
Draw 1 whole and 6 tenths. Remove 8 tenths. Regroup if needed.

Equation: _____

Answer: _____

3. Use an area model.
Draw a rectangle to show 0.5×0.4 .
Shade the overlapping part.

Equation: _____

Answer: _____

4. Use decimal strips.
Show 1.2. Divide it into 4 equal parts.

Equation: _____

Answer: _____

5. Use a hundred grid.
Shade 0.91. Cross out 0.36.

Equation: _____

Answer: _____

6. Use base-ten blocks.
Draw 4 tenths and 3 tenths.
Combine them.

Equation: _____

Answer: _____

7. Use an area model.
Draw a rectangle to show 0.7×0.3 .
Shade the product.

Equation: _____

Answer: _____

8. Use decimal strips.
Show 0.8. Divide it into 2 equal parts.

Equation: _____

Answer: _____
