

Multi-Character Description and Growth Over Time

Read the Passage: In September, Amelia sat in the front row, her hand always raised before the teacher finished a question. She corrected others when they mispronounced a word and often walked out of group work complaining under her breath. Jonah, meanwhile, preferred sitting by the window. He rarely spoke unless called on, but when he did, his answers were thoughtful and precise.

By March, things had shifted. Amelia still answered quickly but had started waiting a moment to see if others would speak first. She smiled more and offered help to classmates struggling with assignments. Jonah, on the other hand, volunteered for group leadership roles and began greeting people in the hallway, a quiet confidence replacing his earlier silence.

Your Task:

1. Describe how Amelia's character changes over time.
2. Describe how Jonah's character changes.
3. How are their personalities different at the beginning of the school year?
How are they similar by March?
4. Write a short paragraph (5–6 sentences) summarizing the character growth of **either Amelia or Jonah** using descriptive language.
